

How Vaccines+ can be the Way to Get Out and Stay Out of Lockdowns

Independent Scientific
Advocacy Group

ISAG public meeting and press conference – 12pm, Wednesday 16 June 2021

As the UK looks at delaying the lifting of coronavirus restrictions, **Prof. Aoife McLysaght** will discuss this with **Dr. Gabriel Scally** this Wednesday, along with the best way for Ireland to save this outdoor summer, we have just begun to enjoy.

Watching countries ahead of us in their vaccine roll-out achieve days where new case numbers don't rise above 10, it is important to know that they are using a Vaccines+ strategy. This means high levels of population vaccination plus travel restrictions, indoor mask wearing and other measures, in particular those right now aimed at preventing re-seeding by variants of concern like Delta.

Join ISAG team members this Wednesday, when we will answer any questions about the science, where we are now in the pandemic.

To attend, listen and ask questions, click here to register:

https://us02web.zoom.us/webinar/register/WN_BS2Ijv76SG2KReNzic1QcQ

This will primarily be a Questions and Answers session. We welcome advance questions from members of the press, politicians, special interest groups and the public sent to: isagcovid@gmail.com , or ask them live.

BACKGROUND DETAILS:

ISAG (Independent Scientific Advocacy Group) is offering the group's expertise and experience to work together with Governments and the people to aim for Zero Covid, meaning zero mystery cases in our shared islands. Founded by Anthony Staines, Gerry Killeen, and Tomás Ryan in June 2020, I.S.A.G. is independent of the government. All of our members are volunteers and they freely commit their time every week to discuss the COVID-19 science that underpins our governments' response strategies. ISAG is a multidisciplinary group of scientists, academics, and researchers who have come together to advocate for a SARS-CoV-2 elimination strategy. I.S.A.G. has published several papers outlining its strategy and recommendations, and you can find them at www.isagcovid19.org
